*IMPROVED COOLSHADE. U. S. PLANT PAT. NO. 1747

EXTREMELY HARDY—survives drought conditions, transplants easily, highly resistant to insects and diseases.

UNUSUALLY TOUGH—very resistant to breakage from strain of ice or wind.

MOST SERVICEABLE—produces a quick shade, may be planted close to residences without danger of heavy over hanging limbs, is uniformly branched and densely foliated.

HANDSOME AND STATELY—compact, grows rapidly without producing an unsightly whippy top and has a non-croching straight central trunk.

EXCELLENT LAWN TREE—grows to a medium height (35 to 50 ft.), very tolerant of soil conditions, leaves 3 to 3½ inches long of a lively green color.

*Patented and introduced by

Introducers of Upright Euonymus radicans (Sarcoxie)

A SENSATIONAL NEW "FIRST" IN QUICK SHADE

- First Hybrid Elm to receive a United States Plant Patent.
- First selection of an improved form of the original Elm Coolshade introduced in 1946.
- A first in a rapid growing tree that can be recommended to compete with hard wood qualities.

BULK STRAWBERRY PLANTS

No other fruit gives such quick results as Strawberries. Planted one spring, they give a full crop the next, and with proper care a patch lasts several years. Plant 2 feet apart in the row, the rows $3\frac{1}{2}$ to 4 feet apart; planted 2x4 feet requires 5,400 per acre. These plants are well rooted, properly cleaned and carefully packed. All varieties listed are perfect flowered and will bear alone.
